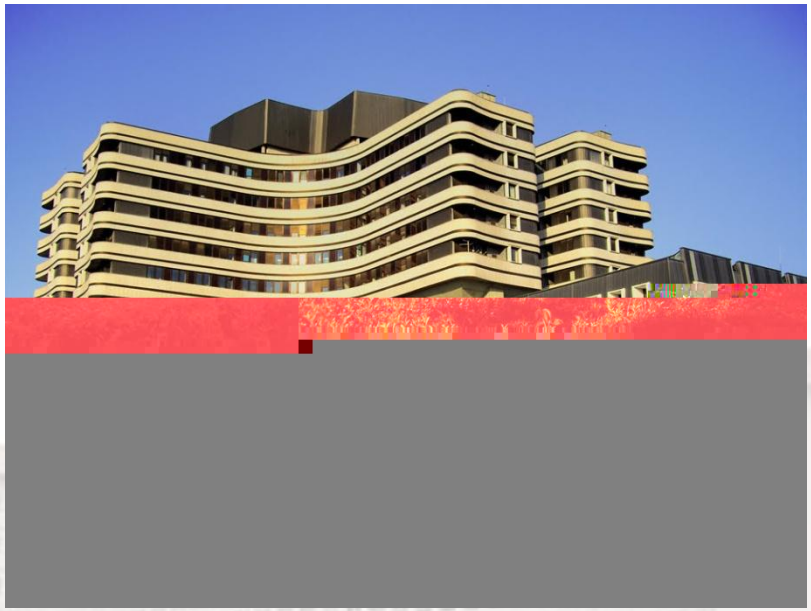
PROJECTING



MMA (Military Medical Academy)

Military Medical Academy (MMA) is a leading institution in the fields of treatment, preventive medicine, pharmacy, education and medical research in and around Serbia and in the region of Southeastern Europe as well. MMA is a hospital of so called central type which ensures that a consultation meeting of top medical experts of all profiles can be called up in 10 minutes to respond urgently and effectively to the most complex and challenging medical cases.

The Management Board of the Military Medical Academy comprises the Head, Deputy Head, heads of departments of Operations and Training, Human Resources, and Morale and Public Relations more information), heads of sectors for Treatment, Preventive Medicine, and Logistics, the head of the Institute of Pharmacy (more information)

The Sector for Treatment has 27 clinics and 17 institutes, including the Diagnostic Outpatient Clinic, Poison Control Center, Emergency Center and Center for Organ and Bone Marrow Transplantation. It provides more than 5000 various diagnostic and therapeutic procedures ranging from most simple to most complex such as tissue and solid organ transplantations and complex surgical procedures what ranks the Military Medical Academy among the well-known medical institution in the world.

In addition to the treatment, education of medical personnel of all profiles and medical research are smoothly conducted following the highest standards and MMA's specifics. ..... (more information)

The expertise of the MMA's medical professionals including 470 physicians, 40 dentists, 36 pharmacists and 1400 medical technicians of all profiles represents a reliable guarantee of the MMA's success. There are, at any point of time, around 400 young national and international specialists undergoing one of our postgraduate medical education programs in a variety of fields. On the other hand, MMA's professionals are given the opportunity to be trained in the internationally-known medical institutions while the world renowned medical experts are invited to visit MMA as guest lecturers.

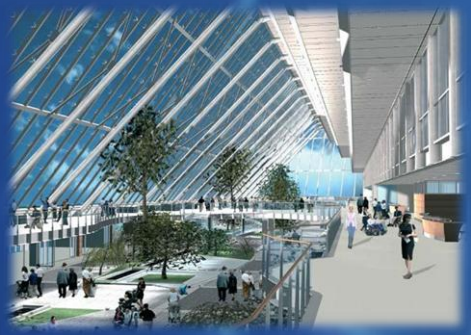
The Military Medical Academy boasts state-of-the-art technology and applies world standards. Apart from the other things, the multislice CT scanner of the latest generation with unlimited diagnostic capabilities has been purchased recently and the linear accelerator used for the treatment of malignant patients has also been upgraded. It is the most sophisticated accelerator in the Balkans.

The whole complex covering the area of 21 hectares contains 180.000 square meters of the hospital building divided in more than 60 different technical-technological entities with 6.000 premises. The unique architectural complex of the Military Medical Academy has still, 25 years after its construction, remained one of the symbols of the city of Belgrade, the capital of Serbia.

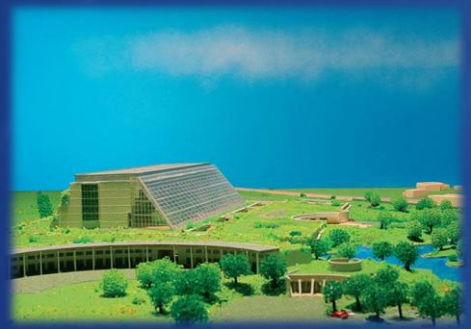
BUILDING

Hospital building works

The official opening of the new Mestre Hospital (Venice)



One of the most technologically advanced in Europe and is a prime example of GREEN building design.



Potential n. inhabitants in provincial catchment area	**800,000**
N. rooms (2 beds + bathroom)	**350**
Cots	**20**
Day hospital and Day Surgery	**72**
N. rooms equipped for dialysis	**35**
Personnel parking	**535**
Visitors' parking	**557**
N. hospital beds	**680**
Operating theatres	**16**
Intensive Therapy	**24**

MANAGEMENT

- Medical and paramedical staff
- Electromedical facilities (biomedical engineering)
- Information system
- Medicines supply and logistic medicine
- Hotel services (canteen)
- First aid
- Administartive area
- Research area collaborative with Veneto universities
- Moutuary service
- Religious assistance
